Clinical Diagnosis and Personalized Treatment of Cerebral Palsy

Message from the Guest Editors

The clinical management of patients with cerebral palsy (CP) is often challenging due to the complex nature of the condition and difficulties in identifying affected children early in life. Recent advances in genomics, cell and tissue physiology, biomechanics, imaging technologies, and integrated therapeutic approaches have opened dramatic new possibilities for improving diagnosis, clinical care, and quality of life for individuals with CP. For this Issue of the *Journal of Personalized Medicine*, we seek articles from a broad range of disciplines that address the early identification of CP, targeted medical and surgical care, personalized therapeutic and rehabilitative pathways, and precision medical approaches for all types of cerebral palsy. We are particularly interested in findings that expand the potential for targeted care early in life and personalized interventions across the lifespan.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
