

## Special Issue

# Genetics, Personalized Diagnosis and Treatment of Oral Disease

### Message from the Guest Editors

We are proud to serve as for this Special Issue of *JPM* (ISSN: 2075-4426, IF 3.508) entitled “Advances and Perspectives in Diagnosis and Treatment Strategies for Prostate Cancer”. Prostate cancer is the second most diagnosed cancer in men, constituting one of the leading causes affecting men’s global health and quality of life. In recent years, a significant improvement in diagnostic techniques has occurred, allowing for the earlier detection of prostate cancer, due to the rise of magnetic resonance imaging (MRI) and the use of the PI-RADS™ v2 score. Moreover, based on histological reports, patient-tailored prostate cancer treatment strategies range from active surveillance, watchful waiting, or focal therapy to open–laparoscopic–robotic radical prostatectomy or radiotherapy. With this in mind, the aim of our Special Issue is to highlight the latest advances in the landscape of the diagnosis and treatment of prostate cancer. Considering the above, we would like to cordially involve you in this emerging research field. We would be pleased to know of your interest in contributing to our Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
