

Special Issue

Personalized Medicine in Psychiatry: Challenges and Opportunities

Message from the Guest Editor

I am thrilled to extend a warm invitation for you to contribute your manuscripts to our Special Issue, “Personalized Medicine in Psychiatry: Challenges and Opportunities”, within the esteemed *Journal of Personalized Medicine*. We welcome you to embark on a collaborative interdisciplinary journey with us. We are eager to receive contributions that delve into the realms of the cutting-edge research, innovative methodologies, and insightful perspectives that are reshaping the boundaries of psychiatric care. Whether you are unraveling the genetic basis of mental health disorders or exploring the impact of biomarkers on treatment response, your work is crucial to fostering a vibrant dialogue among researchers, clinicians, and stakeholders. Let us not forget the importance of public health and epidemiology research—without real-world data, personalized medicine would not be the force it is today. Join us in this exciting intellectual endeavor. Your insights and expertise will be shaping the future of personalized medicine in psychiatry. We look forward to your invaluable contribution.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
