Immune-Mediated Diseases

Message from the Guest Editors

Immune-mediated diseases constitute a broad spectrum of diseases that cause serious consequences in patients. These diseases result in a clear compromise of immune response, which can cause an abnormal functioning of organs and systems, with responses at a systemic level. In this sense, immune-mediated diseases are not known in all cellular and molecular mechanisms. In addition, the repercussions on patients themselves are severe at both social and psychoneuroendocrinological levels. In this Special Issue, we want to bring together research that will allow us to give our patients personalized and more effective medicine.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
