Basic Research in Endocrinology: A Modern Strategy for the Development and Technologies of Personalized Medicine

Message from the Guest Editors

You are invited to take part in the all-Russian conference with international participation “Basic Research in Endocrinology: A Modern Strategy for the Development and Technologies of Personalized Medicine,” which will be held in Novosibirsk, 26–27 November 2020. The purpose of this conference is to disseminate the latest basic and clinical findings in the fields of etiology, clinical characteristics, and modern diagnostics and treatments of endocrine disorders among a wide spectrum of specialists. The conference will include plenary sessions, specialty sessions, satellite symposia, and an open competition for young scientists. The present Special Issue will feature the works presented at the conference that promote linkage of personalized medicine. Researchers and academicians are cordially invited to contribute original research papers or reviews in all aspects of precision medicine and personalized therapies to this Special Issue of *Journal of Precision Medicine*. Both full papers and review articles are very welcome.
