

Special Issue

Emerging Role of Bioinformatics Tools and Software in Evolution of Epidemiology

Message from the Guest Editors

The increasing availability of health-related information originating from disparate electronic sources (including social media) has resulted in a growing need of new methods and tools for data analysis and synthesis. Additionally, advances in electronic reporting and interoperability of claims or clinical databases across different healthcare systems have put pressure on the integration of informatics, statistics, epidemiology, and public health disciplines to translate these advances into reliable scientific evidence. This pressure has been particularly active for surveillance systems, including those associated with infectious disease control and vaccine/drug safety monitoring. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the science and showcase some of the latest example in the field of multiple database exploitation for public health purposes. Studies may also include those that explore the impact of the COVID-19 pandemic on healthcare services and health-related events using clinical and population-based approach.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
