New Insights into Personalized Surgical Oncology

Message from the Guest Editor

In a significant number of cancer treatment cases, surgery remains the cornerstone for achieving long-term survival. At the same time, the concept of personalized medicine has evolved over the last decade, thereby increasing the chances of improving long-term outcomes. In this Special Issue, entitled "New Insights into Personalized Surgical Oncology", we invite clinical researchers and scientists to contribute relevant clinical and basic research on cancer. Research on surgical techniques, improvements in clinical practice, the application of cutting-edge technologies, and personalized perioperative management also fall within the scope of this Special Issue. Original articles and review papers (systematic and narrative approaches) are also welcome. Papers that meet the criteria of the peer review process will be accepted for publication. We hope that this Special Issue will enrich our understanding of surgical oncology and further improve the quality of surgical care for cancer patients.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
