# Personalized Diagnosis and Treatment for Obstructive Sleep Apnea

### Message from the Guest Editor

I hope this message finds you well. As the guest editor for our upcoming Special Issue on “Personalized Diagnosis and Treatment for Obstructive Sleep Apnea”, I am excited to invite you to contribute your insights and research to this significant Special Issue. About the Special Issue: Obstructive sleep apnea (OSA) is a complex and heterogeneous disorder with far-reaching health, safety, and economic consequences. Our Special Issue aims to showcase cutting-edge research and advancements in personalized approaches to OSA diagnosis and management, aligning with the principles of personalized medicine. We encourage submissions that explore various facets, including, but not limited to:

- Wearable technology and its role in personalized sleep monitoring.
- Machine learning algorithms for individualized OSA severity prediction.
- Genetic markers influencing OSA susceptibility and treatment responses.
- Anatomical and non-anatomical “Phenotypic Traits” as significant contributors to OSA.
- Innovative personalized treatment strategies, including CPAP customization and alternative therapies.
- Ethical considerations in the era of personalized sleep medicine.
