Special Issue

Functional Impairment Evaluation and Personalized Treatment in Stroke Patients

Message from the Guest Editor

Stroke patients commonly have functional impairments even after proper acute management, and disability after stroke can be a significant burden on patients, caregivers, and society. Many efforts have been made to improve the function in stroke patients. Unlike other diseases, each stroke patient can show different impairments in various functional domains, and a wide variety of factors affect disability in stroke patients. Therefore, it is necessary to apply accurate evaluation for functions and personalized treatment methods in consideration of various characteristics of each stroke patient to improve function. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the science and clinical research of the latest findings in the field of stroke rehabilitation. Studies include those that explore new assessment tools using advance technology, and clinical and patient-based approaches. Scientific advances in the field of neuroscience and stroke rehabilitation will continue to pave the path toward personalized evaluation and treatment for optimal management.

Prof. Dr. Won Hyuk Chang

Department of Physical & Rehabilitation Medicine, Center for Prevention and Rehabilitation, Heart Vascular Stroke Institute, Samsung Medical Center, Sungkyunkwan University School of Medicine, Seoul 06351, Republic of Korea

Deadline for manuscript submissions

closed (28 February 2022)

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker
Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:
indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:
CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
