

## Special Issue

# Towards Personalized Medicine for Chronic Liver Disease

### Message from the Guest Editors

Personalized medicine is a dynamic and rapidly developing approach in clinical practice that involves using innovative technologies to make decisions in the screening, prevention, diagnosis, and treatment of disease. Chronic liver disease is a progressive deterioration of hepatic functions and a continuous process of inflammation, destruction, and regeneration of liver parenchyma, resulting in fibrosis and cirrhosis. The spectrum of etiologies encompasses metabolic disorders, viral infection, toxins, alcohol abuse, and genetic and autoimmune diseases. The *Journal of Personalized Medicine* aims to publish a collection of articles exploring recent findings and progress in personalized medicine for chronic liver disease. We will consider original research, systematic reviews, and analyses that report both experimental and clinical studies on integrating precision medicine in the management of chronic liver disease.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2026).
