Novel Challenges and Advances in Liver Disease

Message from the Guest Editor

Liver disease is a general term that refers to any condition affecting the liver. It may develop for different reasons, such as acute or chronic hepatitis by viral, toxic, autoimmune and other causes, fatty liver disease, hepatocellular carcinoma, liver cirrhosis and liver failure. There have been many studies on novel challenges and advances of liver disease, but the field still needs continuous effort and research. The aim of this Special Issue of *JPM* is to evaluate and discuss novel challenges and advances in liver disease. It includes the study of disease mechanism, diagnosis and differential diagnosis, medical management, surgical management and prognosis. We invite colleagues around the world to share their experience and knowledge on novel challenges and advances in liver disease with original studies, reviews or communications in order to develop this important field.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
