

## Special Issue

# Diagnostics and Interventional Procedures in Gynecological Tumors

### Message from the Guest Editors

Gynecological cancers include a large compound of diseases that vary in etiology, biological behavior, and treatment. The five main types of gynecologic cancer are ovarian, uterine, cervical, vaginal, and vulvar cancer. Each of them requires a multidisciplinary management and an accurate diagnostic framework, which is crucial to provide adequate treatment. The continuous technological imaging evolution provides ever more accurate clinical staging and pathologic prediction, increasing the tailoring of disease treatment and improving patient outcomes. Moreover, different imaging modalities and their combinations are increasingly used to guide interventional and minimally invasive procedures performed for diagnostic and therapeutic purposes. It is our pleasure to invite you to submit to this issue original articles or reviews highlighting milestones and new evidence in the gynecologic oncology field, regarding each diagnostic and interventional method and their related clinical practice algorithms and current recommendations.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
