

Special Issue

Personalized Cardiothoracic Surgery: Treatment and Management

Message from the Guest Editor

New technologies and medical developments have been taking traditional cardiothoracic surgery to more minimally invasive approaches and personalized treatments. This Special Issue aims to collect new evidence on innovations, integrated management, and therapeutic strategies that have been involving thoracic and cardiac surgery in the last few years. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Updates and new developments in cardiothoracic surgery.
- Personalized medicine and innovations.
- Minimally invasive thoracic surgery (VATS and RATS).
- Mediastinal surgery.
- Oncological integrated strategies for treatment.
- New techniques for regional anesthesia in cardiothoracic surgery.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2026).
