

Special Issue

Sepsis Management and Critical Care

Message from the Guest Editor

Personalization in intensive care is increasingly invoked. However, there are not many studies or reviews focused on this aspect and with this vision. In this issue of the *Journal of Personalized Medicine* we will try to address some of the most controversial or interesting aspects of the treatment of sepsis and in critical care from this point of view. We do not intend to answer everything, nor cover all the topics, but the topics included in this issue will have a vision aimed at individualization or at least phenotyping of septic patient management, and critical care. High-risk patients with sepsis and multi-organ failure, in intensive care, and the diagnosis, monitoring and therapies used in critical care are a challenge, because there is no size fits all. Our interest is proportional to the reading of this special issue some light in some of the aspects related to those challenges.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
