Special Issue

Geriatric Medicine: Towards Personalized Medicine

Message from the Guest Editors

The field of geriatrics is expanding globally, driven by changing demographics. Older individuals exhibit diverse clinical profiles, marked not only by their advanced age but also by the presence of multiple chronic diseases as well as problems in the functional and psychosocial domain. As precision medicine and personalized treatment approaches advance rapidly. new possibilities emerge in caring for geriatric patients. Tailoring treatment strategies to each patient's specific health status helps strike the right balance between over-treatment and under-treatment, aligning better with the preferences of elderly individuals. In this Special Issue, we will explore the current state, challenges, opportunities, perspectives, and research directions within geriatrics, with a particular emphasis on enhancing treatment outcomes and the quality of life for this unique demographic. We encourage clinicians and scientists in the field to submit original articles or reviews that align with these objectives.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
