

Special Issue

Personalized Dentistry: From Multidisciplinary Diagnosis to Precision Treatment

Message from the Guest Editor

This Special Issue aims to gather innovative research and comprehensive reviews focused on the multidisciplinary aspects of personalized dentistry and medicine, highlighting how collaboration among different fields can enable precision in diagnosis and treatment planning. We invite submissions of original research articles and reviews that align with the journal's scope:

- Advanced diagnostic tools for personalized treatment planning;
- Role of genetics and genomics in dental disease management;
- AI and digital technologies for precision dentistry;
- Ethical, educational, and regulatory perspectives on personalized care;
- Integration of biomaterials in dental therapies;
- Multidisciplinary case reports and treatment protocols in personalized dental medicine.
