Personalized Medicine in the Field of Inflammatory Skin Disorders

Message from the Guest Editors

Personalized medicine is an emerging field of medicine that has the potential to predict which therapy will be safe and efficacious for individual patients using an individual's genetic profile to guide decisions regarding the diagnosis, treatment, as well as prevention of disease. Personalized medicine stratifies patients based on molecular markers and allows the identification of the best possible solution for the patient. In this respect, inflammatory skin disorders are complex afflictions with a variable course, treatment response, and unpredictable outcome and represent important candidates for a personalized approach. The aim of this Special issue is to gather articles that present recent advancements in research involving the mechanisms that underlie the development of inflammatory skin disorders, skin and mucosal inflammation in general, as well as potential biomarkers for personalized treatment and prevention.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
