

Special Issue

Coronary Syndromes: Clinical Research and Personalized Medicine

Message from the Guest Editors

Coronary artery disease is perhaps the field of cardiology with the longest and largest body of research as it remains the leading form of heart disease and one of the leading causes of death globally.

Notwithstanding, many issues regarding its approach remain under debate, especially regarding medical and interventional/surgical therapy.

This Special Issue will focus on coronary artery disease research, primarily from a clinical standpoint, while addressing the issue of personalizing its approach. Papers may focus on specific subpopulations, via diagnostic or therapeutic strategies, regarding all aspects of coronary artery disease (acute or chronic, epicardial, or non-epicardial). Original research and review articles are particularly sought after, but we also welcome communication papers or systematic reviews.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
