

Special Issue

Surgical Innovation and Advancement in Limb Extremities

Message from the Guest Editors

In the realm of surgical innovation, particularly concerning limb extremities, strides in medical science have reshaped the landscape of patient care.

Our forthcoming Special Issue aims to capture the essence of this journey, showcasing the latest advancements and innovations in surgical techniques and practices concerning limb extremities. We invite contributions that delve into the intricacies of surgical innovation, encompassing topics such as prosthetic developments, minimally invasive procedures, regenerative medicine applications, and advancements in rehabilitation protocols.

Authors are encouraged to submit original research articles, comprehensive reviews (including systematic reviews), and insightful communications that offer fresh perspectives on the diagnosis, treatment, and rehabilitation of limb extremity conditions. Furthermore, we welcome contributions discussing expert consensus, guidelines, and emerging surgical paradigms poised to redefine patient care in this dynamic field.

Join us in charting the course towards enhanced patient outcomes and transformative surgical practices in limb extremity care.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
