Advances in Treatment of Urinary Bladder Cancer

Message from the Guest Editor

Urinary bladder cancer is among the top ten most common cancer types in the world, with approximately 550,000 new cases annually. At present, 75% of cases are non-muscle-invasive bladder cancer (NMIBC), and the others are muscle-invasive (MIBC), a progression from the first kind. The identification of targets and potential biomarkers based on genomic sequencing analyses can also be useful for predicting the response of novel therapeutic strategies. Therapy has in recent years evolved from surgery to oncological combination therapies, and more recently, immunotherapeutic strategies have been added to the treatment arsenal. This Special Issue aims to present new and innovative approaches and results relating to basic science, translational research, and epidemiology in the field of urinary bladder cancer. The scope entails studies on non-muscle-invasive urinary bladder cancer (NMIBC) as well as those on muscle invasive urinary bladder cancer (MIBC) and papers investigating molecular biomarkers' response to treatment and radiomics to improve staging in urinary bladder cancer. We welcome original articles and review papers.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
