

Special Issue

Neuropsychological Disorders: Interventions and Treatments

Message from the Guest Editors

We are thrilled to present the *Journal of Personalized Medicine's* Special Issue on “Neuropsychological Disorders: Interventions and Treatments”. This Special Issue delves into the complexities of conditions affecting the central and peripheral nervous systems, along with the internal mechanisms governing mental processes. Neuropsychological disorders and dysfunctions, which are influenced by genetic factors, infections, and environmental health issues, demand critical attention. Their impact on health, evident in symptoms from physical impairments to emotional disturbances, emphasizes the urgency of their comprehensive study. Recognizing the intricate interplay between these disorders and dysfunctions is crucial for effective intervention and treatment strategies, which are essential to improving overall health outcomes. We are open to scientific articles that will help shape this Special Issue. Your insights will significantly contribute to understanding neuropsychological disorders and interventions, enriching the ongoing dialogue. Thank you for considering our invitation; we eagerly anticipate receiving your submissions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
