

Special Issue

Musculoskeletal Diseases: Aetiology, Clinical Implications, Rehabilitation and Treatment

Message from the Guest Editors

Musculoskeletal diseases have a great socioeconomic impact and are an important cause of disability. Sport, work, genetics, and old age can be causes of these pathologies, which represent an ever-present medical challenge. This Special Issue aims to explore all the aspects concerning musculoskeletal diseases, starting from clinical complaints, with a special emphasis on pain and its disabling consequences, and continuing with therapy and rehabilitation. In particular, traditional approaches and new treatments will be addressed. We especially encourage the submission of interdisciplinary works and multi-country collaborative research. We welcome submissions of original research papers using different study designs and critical and relevant reviews, including systematic reviews, methodological papers, and manuscripts that emphasize theoretical content.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
