

Special Issue

Advancements in Neurosurgical Oncology: Bridging Neurosurgery and Cancer Neuroscience

Message from the Guest Editor

Within this special issue, we aim to gather a diverse array of research articles, reviews, and brief reports that push the boundaries of our current understanding and clinical practices. Potential topics include, but are not limited to, the role of the nervous system in cancer development and progression, neuro-oncology, the impact of tumors on neural function, and innovative treatments targeting these intersections. This Special Issue provides an excellent platform for researchers and clinicians to share their groundbreaking work with the global medical community. Contributions may address various aspects of neuroscience and oncology, including molecular pathways, clinical case studies, therapeutic trials, and translational research. We would be honored if you could contribute your expertise and research findings to this Special Issue. Join us in advancing the field of cancer neuroscience and making significant impacts on patient care and outcomes.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
