

Special Issue

Prevention and Management of Oral Healthcare

Message from the Guest Editor

Oral health encompasses varied forms and conditions that include dental disease, oral pathogens, head and neck disease, craniofacial trauma, and facial deformity. Oral healthcare is an important factor for people to maintain their overall health and improve quality of life. Recent medical and technological innovations have improved our diagnosis and contributed to the varied and multidisciplinary treatments available. Therefore, oral healthcare combines basic research and clinical treatment including innovative, precision, and personalized medicine in all aspects of craniofacial and oral conditions. This Special Issue intends to describe the state-of-the-art treatment in oral healthcare. I invite you to submit original research or review articles in the field of oral health.
