# Special Issue

# Precision Medicine for Oral Diseases

# Message from the Guest Editor

Oral diseases are not still well managed because the mechanisms of them are not completely understood. However, several paradigm shifts have occurred in the different fields and possible or novel diagnostic devices and therapeutic modalities may be expected. This Special Issue will focus on the development of clinical or pre-clinical examination, diagnosis, and treatment modalities by novel or advanced technologies including artificial intelligence (AI) against various oral diseases. This encompasses a wide scope of research topics, and includes endodontic diseases, endo-perio lesions, periodontal disease, peri-implant diseases, orofacial pain, dry mouth (xerostomia), trauma, oral cancer, and cleft lip and palate. We are looking for critical review papers that may provide important knowledge and identify clinical questions and resolutions of various oral diseases. Original clinical and pre-clinical research papers as well as basic research papers that may provide solutions to the challenges of diagnosing and treating patients with oral diseases are also welcomed.

## **Guest Editor**

Prof. Dr. Keiso Takahashi

Division of Periodontics, Department of Conservative Dentistry, Ohu University School of Dentistry, Koriyama, Japan

# About the Journal

# Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

#### Editor-in-Chief

#### Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

#### **Author Benefits**

# **High Visibility:**

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
