

Special Issue

Personalized Diagnostics and Therapeutics for Head and Neck Surgery

Message from the Guest Editor

In recent years, advances in computer-assisted surgery have made it increasingly possible to offer personalized reconstructions to patients undergoing head and neck surgery. Reconstructions with patient-specific implants and surgical templates must be mentioned specifically in this context. In this respect, further developments should now focus on decreasing the workflow and, above all, increasing user friendliness and the faster availability of individual solutions. However, new knowledge in the field of personalized diagnostics with regard to potential prognostic factors and personalized (non-)surgical therapy approaches for head and neck oncology is an exciting and forward-looking topic of research. With this Special Issue, authors are invited to present their most recent developments and findings in personalized diagnostics and therapy in the field of head and neck surgery.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
