

## Special Issue

# Emergency Medicine: Clinical Advances and Challenges in Diagnosis and Treatment

### Message from the Guest Editor

At present, new paradigms have emerged in emergency medicine that have revolutionized the way we perform clinical work in our hospitals, from empiricism to evidence-based medicine. The objective of this Special Issue is to gather valuable information regarding novel approaches to diagnosis and treatment in the field of emergency medicine and critical care by publishing research papers that have a significant impact, offer new insights, demonstrate high quality and originality, and ultimately capture the interest of our readers. Moreover, it aims to highlight new trends in effectively training young doctors specializing in critical care medicine. We have a particular interest in studies that present newer technologies to facilitate emergency physicians' work and to assure a qualitative management of the patients, both adults and children.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
