

## Special Issue

# Tailored Strategies in Abdominal Surgery

### Message from the Guest Editors

Abdominal surgery represents a continuously evolving field where precision, customization, and multidisciplinary approaches have become central to optimizing patient outcomes. Over the last decades, advances in imaging, molecular profiling, minimally invasive techniques, and artificial intelligence have deeply transformed both oncologic and benign surgical indications. Historically, surgical decision making was often based on generalized protocols; however, the emergence of personalized surgery allows for a patient-specific tailoring of operative strategies, perioperative care, and adjunctive therapies. The aim of this Special Issue is to present high-quality contributions addressing innovative approaches, individualized surgical techniques, novel perioperative management strategies, and the integration of molecular and technological advances into abdominal surgery. We strongly encourage submissions reporting original research, clinical trials, technical notes, systematic reviews, and cutting-edge translational studies that may contribute to defining new standards for personalized surgical care.

### Guest Editors

Dr. Damiano Caputo

Research Unit of General Surgery, Università Campus Bio-Medico di Roma, 00128 Rome, Italy

Dr. Roberto Cammarata

Operative Research Unit of General Surgery, Fondazione Policlinico Universitario Campus Bio-Medico, 00128 Roma, Italy

### Deadline for manuscript submissions

25 March 2026

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
