

## Special Issue

# Liver Diseases: Diagnosis and Treatment in the Era of Personalized Medicine

### Message from the Guest Editors

Liver diseases—including hepatitis, cirrhosis, and hepatocellular carcinoma—represent a significant global health burden. In recent years, the rise of personalized medicine has transformed the landscape of hepatology. Advances in biomarker discovery, high-throughput omics technologies, and artificial intelligence and machine learning are enabling earlier detection, more accurate disease classification, and the development of targeted therapeutic strategies. This Special Issue aims to highlight the latest progress in the personalized diagnosis and treatment of liver diseases. We seek to promote the integration of molecular and basic research with clinical applications, foster translational approaches, and ultimately contribute to improving patient outcomes and quality of life. We welcome the submission of original research articles, reviews, and methodological papers related to liver diseases and personalized medicine, particularly those focused on molecular diagnostics, omics-based approaches, precision therapeutics, and clinical implementation.

### Guest Editors

Dr. María Teresa Arias-Loste

1. Gastroenterology and Hepatology Department, University Hospital Marqués de Valdecilla & Research Institute IDIVAL, 39008 Santander, Spain
2. School of Medicine, Cantabria University, 39005 Santander, Cantabria, Spain

Dr. Armando Raúl Guerra-Ruiz

1. Biochemistry and Clinical Analysis Department, University Hospital Marqués de Valdecilla & Research Institute IDIVAL, 39008 Santander, Spain
2. Committee of Hepatology and Gastroenterology, Spanish Society of Laboratory Medicine, 28033 Madrid, Spain

### Deadline for manuscript submissions

30 April 2026

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

---

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
