Precision Medicine in Breast Cancer: From Basic Research to Clinical Practice

Message from the Guest Editors

Precision medicine (PM) has become the modern-day approach to breast cancer management. Depending on the genetic variations, environmental factors, and lifestyle dynamics of each individual, PM aims to accomplish optimal therapeutic results, with reduced or no side effects, in a reasonable time and at an appropriate cost. The approach of PM to disease management has been driven by the evolution of molecular biology and the opening of the human genome. PM is applied to most branches of medicine, including oncology, preventive medicine, and genetic and inherited disease, and there are no ethical dilemmas or moral challenges related to PM.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
