Special Issue

Novel Diagnostics and Therapies for Infectious Disease

Message from the Guest Editors

This Special Issue aims to bridge the gap between traditional methods and the latest innovations in diagnosing and treating infectious diseases, emphasizing the critical need for more effective and precise strategies in the current global health landscape. Reflecting on the evolution of infectious disease management, this issue acknowledges past methodologies, while highlighting the importance of integrating new research and technology to combat emerging and re-emerging infections. Our objective is to showcase research that pushes the boundaries of knowledge in infectious disease diagnostics and therapy, including, but not limited to, novel methodologies, technological advancements and comprehensive treatment strategies. We are looking for original research articles and review papers that contribute significantly to the fields of infectious diseases, particularly those that address challenges in diagnosing and treating complex infections, enhancing infection control and improving patient outcomes.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
