PROomics: Patient Reported Outcome (PRO) and Self-Tracking for Personalized Medicine

Message from the Guest Editor

What is more personalized than including individual observations, personal feelings, and mood, as well as self-tracked data into the medical decision process? Individual observations, personal feelings, and mood constitute the so-called Patient-Reported Outcome (PRO). In daily life, we are facing a constantly growing number of PRO measurements based on digital applications. At the same time, the amount of medically useful data coming from self-tracking or wearable devices is rapidly increasing as well. PRO and self-tracking data represent a new class of medically valuable data. We have named them PROomics. As there are few or nearly no models on how to incorporate PROomics information into personalized medicine, we would like to invite researchers working in this field to submit their manuscripts to this Special Issue. PROomics means looking at patients' documented and recorded data beyond a single questionnaire and making them available for research and medical care. Manuscripts of interest can range from basic research to clinical routine.

Deadline for manuscript submissions

closed (15 August 2020)

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker
Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:
indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:
CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
