

Special Issue

Optimizing Treatment of Parkinson's Disease

Message from the Guest Editors

Effective treatments for symptomatic control of Parkinson's disease (PD) have developed during the last two decades. These include combinations of oral drugs as well as transdermal delivery and devices for subcutaneous and intestinal infusions that have been developed in parallel with deep-brain stimulation (DBS) for PD and other movement disorders. The scope of this Special Issue "Optimizing Treatment of Parkinson's Disease" is the latest approaches for meeting the need of continuous individualization of the therapies. Current research is expanding on optimization of treatment outcome in terms of efficacy, safety, and quality of life, and the rapid development of wearables and home-based monitoring technologies is encouraging. We invite researchers in the field to submit original research and review articles including (but not limited to) studies on the fine-tuning of treatments in PD and other movement disorders using objective movement analysis, DBS, personalized and precision medicine, pharmacogenomics, bioinformatics, integrative computational approaches and clinical biomarker discovery.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
