The Pathogenesis and Treatment of Psoriasis and Skin Tumors

Message from the Guest Editor

Psoriasis and skin tumors, such as cutaneous squamous cell carcinoma and melanoma, are abnormal skin diseases which bring a great burden to some patients and society. However, the pathogenesis of these diseases is not clear and there is a need for more research on the pathogenesis and new therapies. This special issue of the *Journal of Personalized Medicine* aims to show some of the latest findings in the field of Psoriasis and skin tumors. Studies include those that explore the pathogenesis or the treatment of Psoriasis and skin tumors using basic science, clinical and other approaches. The scientific advances in the field of Psoriasis and skin tumors will continue to pave the path towards personalized treatment for patients.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
