

Special Issue

Personalized Care for HIV Prevention, Treatment and Cure

Message from the Guest Editor

Great strides have been made in HIV testing and treatment over the last 30 years, the management of HIV can benefit from more individualized care. Personalized medicine (PM) has the potential to tailor prevention and care interventions to optimize safety, effectiveness and patient satisfaction. This Special Issue is focused on describing current personalized medicine approaches to HIV care. This encompasses efforts to deliver individualized care using modern technologies and innovative care models for HIV prevention, comorbidities (hepatitis C, cardiovascular, neurocognitive decline, etc.) and treatment so as to improve the length and quality of life of HIV/AIDS patients. This Special Issue will bring together cutting-edge research across disciplines, including the basic sciences, clinical care and the behavioral and social sciences, in order to better understand and intervene to the benefit of people living with HIV. The aim of this Special Issue is to collate evidence-based manuscripts on relevant topics in the field. Research articles, clinical studies, quantitative and qualitative analyses of pilot studies, meta-analyses, and reviews are all welcome.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
