

## Special Issue

# Personalized Medicine for Coronary Artery Disease: Diagnosis, Prevention, and Treatment

### Message from the Guest Editor

Personalized medicine is developing fast, and new data are emerging in huge amounts. This might enable the proper risk assessment, diagnosis, prevention, and therapy specifically tailored to the individual's unique characteristics, thus enhancing the quality of life and public health. Therefore, this Special Issue aims to present recent developments in personalized/individualized medicine and coronary artery disease. We invite authors to submit original studies, reviews, meta-analyses, and case reports focused on the individualization of the prevention, diagnosis, and treatment of coronary artery disease and its complications such as myocardial infarction or heart failure. We are soliciting not only genetic studies but all papers on the broadly understood personalized or individualized medicine, including manuscripts devoted to novel drugs, medical devices, or approaches dedicated to particular subsets of patients.

### Guest Editor

Dr. Jacek Bil

Department of Invasive Cardiology, Centre of Postgraduate Medical Education, Central Clinical, Hospital of the Ministry of Interior and Administration, Woloska 137 Street, 02-507 Warsaw, Poland

### Deadline for manuscript submissions

closed (30 September 2023)

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
