

Special Issue

Personalized Medicine: The Future of Health Care

Message from the Guest Editor

Growth in the type and amount of data that affect health care decisions has enhanced our ability to tailor prevention and treatment interventions. At the same time, technological advances in bio and clinical informatics have made it possible to integrate and use these data to support clinicians at the point of care. However, questions remain as to how to best integrate such innovations into existing practices and keep up with the pace of innovation for optimal outcomes. This Special Issue of the *Journal of Personalized Medicine* presents cutting-edge research and commentary to characterize the future of personalized medicine. Papers from multiple disciplinary perspectives focus on topics that have practical and policy relevance to help to advance the implementation of evidence-based innovation into routine healthcare.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
