

Special Issue

Personalized Medicine with Biomedical and Health Informatics

Message from the Guest Editors

Personalised medicine (PM) is becoming increasingly important in the future of healthcare. PM can be considered a data-driven approach, integrating data from multiple sources on the biological makeup of each individual, the environmental and lifestyle factors, and using such combined information to predict outcomes of treatments/preventions, likelihood of disease, and history of subtypes. This Special Issue aims to investigate how biomedical and health informatics technologies fulfill the promises of PM in improving patient care and disease prevention, reducing healthcare costs alongside improvements in the efficacy and safety of interventions, improving new medical product developments and so on.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
