

Special Issue

Toward the Establishment of Personalized Medicine in Psychiatry

Message from the Guest Editors

The current diagnostic criteria used in the field of psychiatry are manipulative and not based on the pathology of the disease. Thus, treatment strategies based on diagnosis may not always lead to the best results. There is currently no clear indicator of the criteria for selecting medication or other treatment options and, therefore, we are required to repeat the steps of trial and error to find the optimal treatment. In this Special Issue of the *Journal of Personalized Medicine*, we invite researchers in the field to submit original research including (but not limited to) studies on neurophysiology, neuroimaging, the quantification of serum/plasma concentrations of medications and other biological markers. We believe that by consolidating these findings we will be able to develop strategies for individualized treatment in the field of psychiatry.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
