

## Special Issue

# Pharmacogenetics to Avoid Adverse Drug Reactions

### Message from the Guest Editor

Dear colleagues, Although a cure is the main goal of a treatment, serious adverse reactions associated with these treatments are a major problem in clinical practice and cost a lot of money for health systems. These adverse reactions limit the success of medicines and can even lead to the death of patients. Identifying the DNA variants associated with adverse drug reactions can help to personalize medicine and sustain health systems. This Special Issue focuses on these topics: the identification of DNA variants associated with adverse drug reactions, clinical application, and cost-effectiveness studies.

### Guest Editor

Dr. Luis A. López-Fernández

Hospital Pharmacy and Pharmacogenomics, Instituto de Investigación Sanitaria Gregorio Marañón, Servicio de Farmacia, Hospital General Universitario Gregorio Marañón, Madrid, Spain

### Deadline for manuscript submissions

closed (1 July 2021)

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
