Precision Medicine, It Is Time to Tailor and Drive the Treatment in Rheumatic Diseases

Message from the Guest Editors

The term “precision medicine” has become increasingly popular by proposing a medical model which allows to choose a personalized treatment, tailoring therapeutic strategies to the individual characteristics of each patient. In fact, precision medicine has been defined as a new approach for disease treatment and prevention that considers individual variability in genes, lifestyle and environmental exposure. In rheumatic diseases, often characterized by wide phenotypic heterogeneity, precision medicine is still an emerging area. Recently, significant efforts have been made to better understand the pathogenetic mechanisms in several rheumatic diseases. The combination of clinical, laboratoristic, instrumental features and molecular and genetic pathways should allow to identify patients with similar disease courses and treatment responses. Therefore, through knowledge of these features, a precision medicine approach may guide the choice of treatment and the timing of its administration in order to maximize drug efficacy, determining the optimal treatment regimen for each patient. About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
