Biomarkers in Psychiatric Disorders

Message from the Guest Editors

Biological markers—represent a promising opportunity for improving prevention, diagnosis, treatment management, as well as the development of effective therapeutic agents. While for many medical specialties, a limited number of markers are available, psychiatry still cannot rely on similar and universally shared diagnostic, prognostic, or theranostic biomarker tools. The present Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the topic and showcase some of the latest findings in the field of Biomarkers in Psychiatric Disorders coming from genetics, transcriptomics, proteomics, metabolomics, and epigenetics. Special attention will be given to contributions directly related to the shaded area of biomarkers of treatment response pointing to the development of patient stratification strategies. Integrative approaches integrating multiple biomarkers, including molecular and phenotypic data, are welcome. Original, review, and perspective articles are highly encouraged.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
