

Special Issue

Precision Tumor Therapy: The Role of PARP Inhibitors in Personalized Medicine

Message from the Guest Editor

This Special Issue aims to provide an overview of the therapeutic advances achieved with PARP inhibitors in clinical practice, to identify potential differences in activity among the various agents, and to highlight experimental or anecdotal evidence of activity in non-established indications. We invite submissions of original research articles and reviews that align with the journal's scope, which include, but are not limited to, the following:

- Molecular biology of PARP and PARP inhibitors;
- PARP inhibitors and Ovarian cancer, Breast Cancer, Cancer of the pancreas, Cancer of the prostate, Endometrial cancer;
- Non-established use of PARP inhibitors;
- Combinations of PARP inhibitors and check-point inhibitors across tumor types

Guest Editor

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
