

Special Issue

New Concepts in Musculoskeletal Medicine

Message from the Guest Editor

Musculoskeletal injury (MSI) remains a major contributor to the global burden of disease despite the many advances in the fields of musculoskeletal biology and regeneration as well as reconstructive surgery that have been made in recent years. Patients suffer from disability, continuous pain, functional impairment and associated mental comorbidities. Building upon the lessons learned over the recent years, personalized medicine and biotechnology offer the potential for novel treatment modalities; however, challenges such as a successful translation of pre-clinical results into a clinical stage remain common. Thus, we are pleased to announce the launch of a Special Issue entitled "New Concepts in Musculoskeletal Medicine". This Special Issue will focus on cutting-edge research related to musculoskeletal medicine, orthopedic and trauma surgery, and how novel developments in personalized medicine and biotechnology can help overcome challenges of the past. We look forward to inviting authors to submit reviews or original research appropriate to this scope.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
