

## Special Issue

# New Concepts in Musculoskeletal Medicine

### Message from the Guest Editor

Musculoskeletal injury (MSI) remains a major contributor to the global burden of disease despite the many advances in the fields of musculoskeletal biology and regeneration as well as reconstructive surgery that have been made in recent years. Patients suffer from disability, continuous pain, functional impairment and associated mental comorbidities. Building upon the lessons learned over the recent years, personalized medicine and biotechnology offer the potential for novel treatment modalities; however, challenges such as a successful translation of pre-clinical results into a clinical stage remain common. Thus, we are pleased to announce the launch of a Special Issue entitled "New Concepts in Musculoskeletal Medicine". This Special Issue will focus on cutting-edge research related to musculoskeletal medicine, orthopedic and trauma surgery, and how novel developments in personalized medicine and biotechnology can help overcome challenges of the past. We look forward to inviting authors to submit reviews or original research appropriate to this scope.

### Guest Editor

Dr. Patrick Haubruck

1. Heidelberg Trauma Research Group, Centre for Orthopaedics, Trauma Surgery and Spinal Cord Injury, Trauma and Reconstructive Surgery, Heidelberg University Hospital, Heidelberg, Germany
2. Raymond Purves Bone and Joint Research Laboratory, Kolling Institute, Institute of Bone and Joint Research, University of Sydney, St. Leonards, NSW 2006, Australia

### Deadline for manuscript submissions

closed (15 October 2024)

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

---

### Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
