

Special Issue

Current Status and Future Research in Otorhinolaryngology

Message from the Guest Editors

The amount of recent research and advances in otorhinolaryngology is high, and therefore, the authors present in this Special Issue recent advances and current treatment options in the field. The purpose of this Special Issue is to describe recent advances in otorhinolaryngology, including new diagnostic technological resources and surgical modalities. A resource such as this will be a very useful addition to the otolaryngologist's basic literary armamentarium, as it highlights advances in areas to guide further study. For this reason, we ask that you send in your most recent research on diagnosis and therapy. Trusting in your participation, we send you my best regards.

Prof. Dr. Francesco Dispenza

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
