

## Special Issue

# Musculoskeletal Diseases: Diagnosis, Rehabilitation and Personalized Treatment

### Message from the Guest Editor

Musculoskeletal diseases represent a growing challenge for physicians all over the world. They cause pain and disability, drastically reducing the quality of life of patients. This Special Issue therefore welcomes original articles and reviews that outline the most important innovations regarding the diagnosis and rehabilitation of these pathologies. Moreover, emphasis will mostly be placed on technological innovations such as telemedicine, new diagnostic and treatment tools (especially for pain), new drugs (particularly regenerative medicine), and solutions that facilitate the creation of individualized and effective therapy protocols.

### Guest Editor

Dr. Giacomo Fari

Department of Experimental Medicine (Di.Me.S.), University of Salento,  
73100 Lecce, Italy

### Deadline for manuscript submissions

31 January 2026
