

Special Issue

Advances in Neuromuscular Care and Treatments

Message from the Guest Editors

The aim of this Special Issue is to invite original articles, notable clinical findings, and review articles to discuss the latest advancements of research and clinical experience with respect to the reconstruction of peripheral nerve lesions. A variety of questions come to mind, only to name a small selection: which diagnostic/imaging tools are valid? What can be achieved with interfascicular neurolysis? Can axons travel for distances longer than 30 cm and promote meaningful function? What is the relevance of contralateral nerve transfers? Where is the time limit for nerve reconstruction of high lesions and when should we opt for nerve/muscle transfers? Are artificial nerve guides a realistic alternative when compared to conventional nerve grafts? With this Special Issue, we invite specialists of all faculties to contribute to this exciting field of research.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
