Special Issue

Advances in the Therapeutics of Neurological Diseases

Message from the Guest Editor

Neurology, as well as other branches of Medicine, is in rapid expansion, particularly in the improvement of diagnostic methods as well as the development of new therapies, including those related to personalized medicine. This Special Issue aims to summarize the most recent advances in the therapy of neurological diseases. For this purpose, I have made an initial selection of several topics of interest related to different subspecialities in the field of Neurology (headache, multiple sclerosis, epilepsy, dementia, stroke, neuromuscular disorders, movement disorders, sleep disorders, ...), although proposals for other topics are welcome.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
