Cancer Biomarkers and Therapy

Message from the Guest Editor

Biomarkers play a crucial role in the diagnosis, treatment, and management of cancer patients. Nowadays, advances in detection technologies allow greater insight into the molecular mechanisms of a variety of malignancies. Additionally, biomarkers are currently in clinical practice with a prognostic role to identify patients' outcome and a predictive role for response to chemotherapy, targeted agents, and immunotherapy. This Special Issue aims at reviewing the current state of cancer biomarker development and the prospects for improving cancer care with new technologies and biomarkers.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
